Oz Trampolines is excited to introduce their range of round trampolines built to the highest quality to ensure they give your children years of fun.

Trampoline Frames

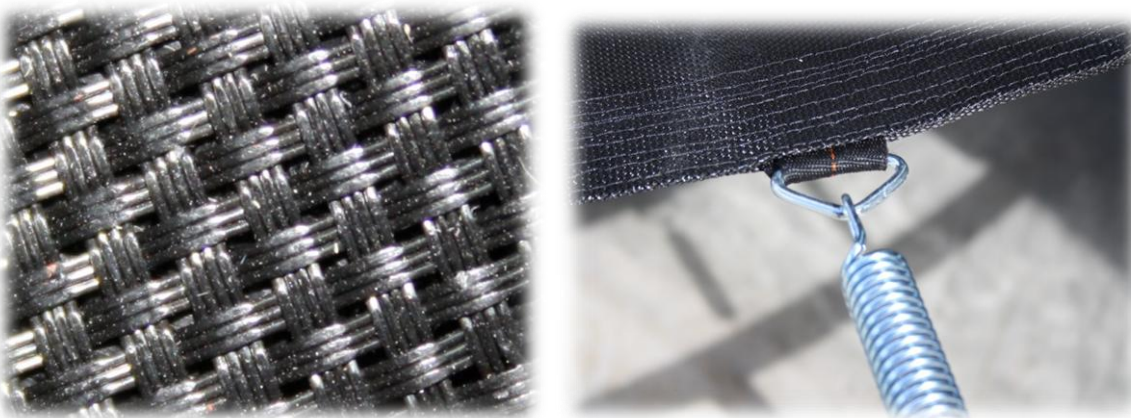

The trampoline frame meets all standards and all joints are strengthened with screws along rubber stoppers on legs to ensure no movement occurs.

Trampoline Mats

Our mats are Woven Polypropylene Mesh and are UV protected. Using USA made material in the 4:3 ratio to ensure they last and have the best bounce. When looking at our high quality mats, if you look really closely you can see the how the mats are woven.

The stitching around the edge of the mat is sewn 8 times to ensure durability.

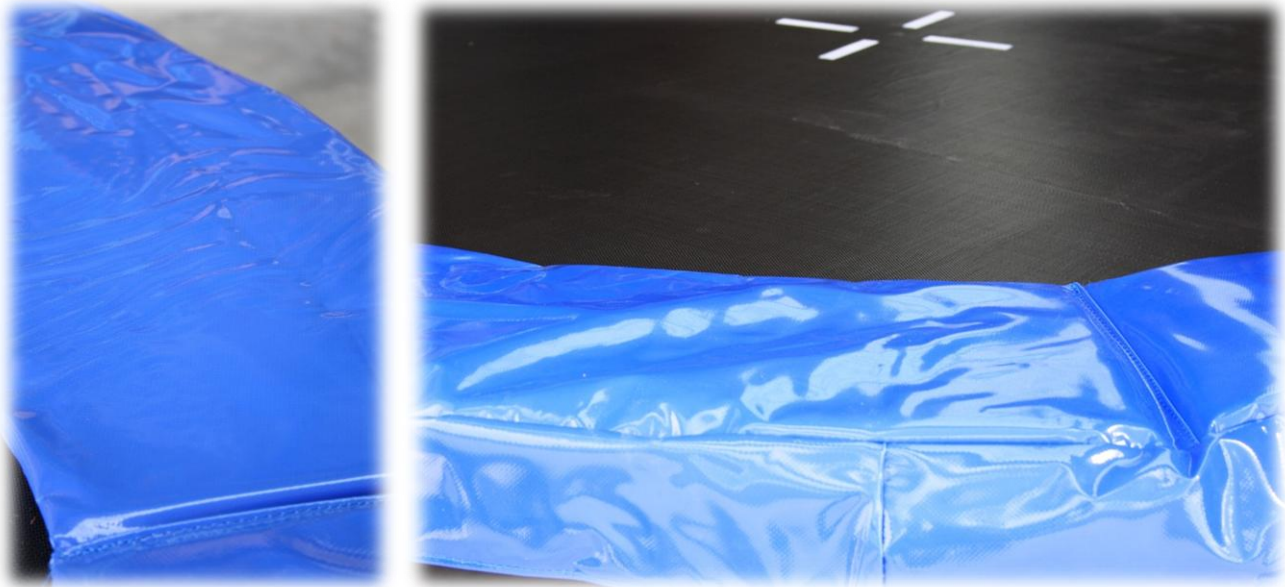

Trampoline Spring Pads

Our trampoline spring pads are made using 550gm PVC something no other company in Australia uses.

Other companies use 330gm PVC on top of the mat and the underneath is PE (a cheaper tarpaulin type material).

Our trampoline spring pads are backed by a 12 month warranty with the option for 2 years.

A lot of other companies only carry a 3 month warranty.

Trampoline Safety Nets

Our net uses the sleeve system over the poles and pole padding, the net is triple stitched to the sleeves to ensure maximum protection for your children if they do fall into the netting. Once again we back this up with Australia's longest warranty of 1 year with the option to extend to 2 years

Weight Capacity Ratings

We have had our trampolines tested and rated at some of the largest weight capacities available on the market today.

See our certificates at the end of this brochure.

6ft 100kgs **8ft** 140kgs **10ft** 180kgs **12ft** 180kgs **14ft** 180kgs **16ft** 160kgs **7x10ft** 160kgs **8x12ft** 160kgs

Always check weight capacities of trampolines to ensure children's safety.

Fair Go Warranty Policy

The team at Oz Trampolines are always looking at how we can make your experience with us a memorable one for all the right reasons.

In listening to our customers we have rewritten our returns and warranties policies to make them more customer friendly.

While we have never charged restocking fees on our parts if you ordered the wrong part from today there will be no misunderstandings on where you stand on returns or warranties.

Hassle FREE Returns and Warranty

While other companies try everything to get you to not claim on a warranty or return a product Oz Trampolines is making your online shopping experience free of worry with our new warranty process and Free Returns Policies.

Fair Go Warranty

Our long warranties covers everything, (apart from the dog chewing on the trampoline) .

If during the term of your warranty part of the trampoline becomes affected by wear and tear, bad manufacturing or the weather we will replace the part free of charge and hassle free.

Just email us a photo of the issue with your name, address, phone number and size of your trampoline with any purchase details you have.

Once we have seen the email and confirmed your purchase we will send you a new part and email you the details.

Free Returns

We know that trampolines are not all the same so if you buy a part from us and it is incompatible with your trampoline we will organize to have the part picked up and returned to us and give you a full refund including shipping.

Just another reason why Oz Trampolines is Australia's leading online trampoline company with the widest range and highest quality replacement parts.

Extras other companies Charge for

At Oz Trampolines we believe when you buy something you should not have to then keep buying extras to make your trampoline complete so we have included the following at no extra charge.

Ladder

You have to have a ladder to safely get on and off the trampoline - why some charge extra for this astounds us.

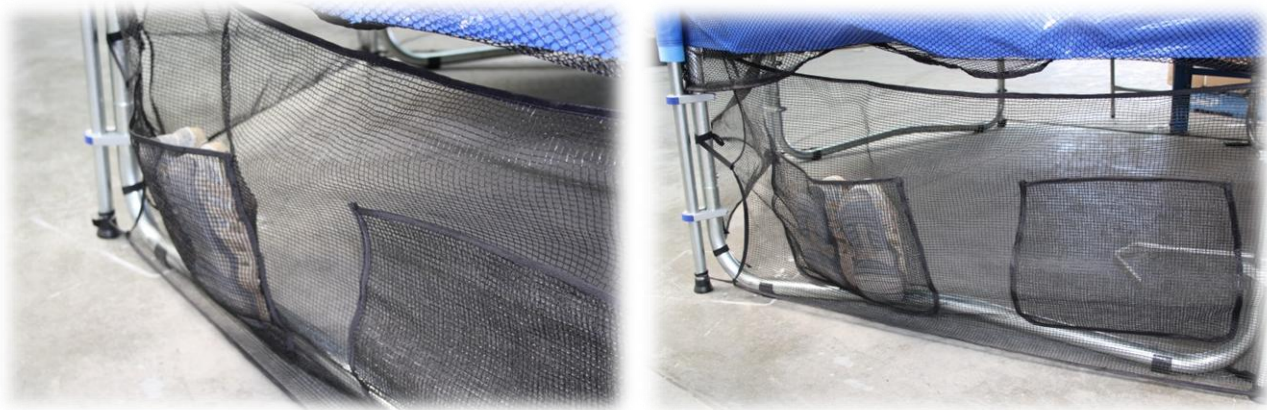

Anchor Kit

Peg your trampoline into the ground to keep it and your children safe from any strong winds.

Pocket Surround

These serve 2 purposes as they stop any children or animals running under the trampoline when someone is bouncing on it and also gives you some pockets to keep your shoes or toys in off the ground.

Weather Cover

Bad weather coming or going on holidays? This handy weather cover can quickly be placed over the trampoline and clipped into place to keep the pads and mat safe.

Spring Tool

A great invention to make the joining of the mat to the springs a 5 minute job instead of 2 hours.

As you can see we don't do things by half's and have spent 12 months researching trampolines to ensure the ones we sell will be of the highest quality.

How To Order Our Full Trampoline Kits

Simply Click on the applicable Size Trampoline Kit you would like below.

[6ft Full Trampoline Kit](#)

[8ft Full Trampoline Kit](#)

[10ft Full Trampoline Kit](#)

[12ft Full Trampoline Kit](#)
