

For instruction videos on how to assemble the Jet Spray, please go to our support page at www.oztrampolines.com.au/videos.asp

The Oz Trampolines Jet Spray is a portable sprinkler system for use on your trampoline. This uniquely designed product fits most trampolines and is the perfect backyard accessory on hot summer days.

Product Inventory

Please check when opening your box that you have:

- 1 x Black Jet Spray Tubing with attached end connector
- 30 x Black Cable Ties
- 4 x Black Pole Clips
- 10 x Brass Spray Inserts

Installation

To enjoy the Oz Trampolines Jet Spray follow the below easy installation instructions. Please note that installation is best performed with 2 people, takes approximately 15 minutes and requires a step ladder.

How to Guide:

- Take your Jet Spray tubing and locate the first spray point.
- Next screw your jet spray brass insert into the spray point.
- Continue this until you have completed this for each of the 10 spray points.
- The next step is to take the end of the Jet Spray Tubing with the attached connector. Feed this over the outside of a pole, running it all the way down. Noting that the rest of the jet spray tubing can be placed inside the trampoline.
- Next connect the Jet Spray Tubing to the trampoline pole using the black pole clips provided.
- Once connected it is now time to attach the Jet Spray Tubing to the top of the trampoline. Locate the first spray point and using a cable tie on either side of the spray point tie to secure.
- Repeat this for each of the 10 spray points, noting that you may need to also use any spare ties to connect the tubing at the point closest to the pole. You may also have some extra tubing for smaller trampolines, this can be easily secured with any spare cable ties.

Continue on next page >

- If you choose, cut the extra length on the ties using scissors.
- Once the Jet spray tubing is attached connect the connector to your hose.
- Water should now run through and you are ready to enjoy your Oz Trampolines Jet Spray.

Please always remember to take care when using the Jet Spray on your trampoline, as water can make the surface of the trampoline slippery. Oz Trampolines does not take any responsibility for any injury caused whilst using the Jet Spray on your trampoline.

Specifications

- Jet Spray Tubing: 10 Metres
- Jet Spray points x 10
- Effective Distance: 10m (without any obstacle)
- One size fits most trampolines - depending on the size of your trampoline you may have overhang which will need to be secured with any spare black cable ties.

Product Maintenance

The Jet Spray maintains its optimum performance when clear from dust, dirt and mildew. Please regularly check parts are clear of these things, wipe the tubing clean and spray parts.

Troubleshooting

Problem	How to solve
The water not feeding through properly- weak spray pressure.	Check the connector is securely attached and make sure no kinks in the Jet Spray Tubing or attached hose.
Water not coming through spray points.	Make sure the Jet Spray points are clear from dirt etc.. and the brass inserts are screwed in correctly.

Warranty

The product warranty is 6 months and begins upon purchase.

Warranty Exclusions:

- Any type of modification or attempt to repair the unit that is not carried out by a technician authorized by the manufacturer.
- Malfunction due to drop, abuse or mistreatment of item.
