

## Basketball Kit (cont.)

### Backboard: Step 9 (cont.)

**Tip:** This stage will require pressure from someone inside the netting and another person outside pushing against the clamp, to ensure the pole is attached securely.

Repeat this process at the top of the netting and the base of the netting to ensure the basketball kit is securely attached.

### Backboard: Finished Stage

Now you are finished simply inflate the basketball using the pump provided to start playing - have fun!

## Trampoline Extras: Tent

### WARNING

This tent is not designed to be permanently erected. The tent should be taken down during windy or rainy conditions.

### Step 1

The first step in assembling your trampoline tent is to assemble the roof.

Firstly lay out the fibreglass rods as shown to the left.

### Step 2

With the roof lining laying facedown insert the fibreglass rods through the sleeves on a diagonal basis.

# Tent (cont.)

## Step 3

Once all fiberglass rods are through all sleeves your roof lining should look as shown here.

(Please note on larger trampoline tents you will obviously have more fiberglass rods than shown.)

## Step 5

Once completed your trampoline tent roof should look like this.

## Step 4

Now insert the end of the fiberglass rods into the pockets at each side of the trampoline tent roof.

## Step 6

The next step is to place the roof loosely over your trampoline safety net.

# Trampoline Extras: Tent (cont.)

## Step 7

Now proceed around the trampoline and attach the clamps to each of your safety poles.

## Step 9

You will be now able to thread the round holding clips through the attachments on the roof lining.

## Step 8

At the same time you can also clip in the round holding clips ready to clip to the roof lining.

## Step 10

Once completed and all clips are secure your trampoline tent roof should look as pictured here.

## Tent (cont.)

### Step 11

Now starting on the section of your trampoline tent where the entrance through your trampoline net is, fix the first section of Velcro strip to the middle Velcro strip on the roof lining. Continue attaching Velcro strips all around your trampoline in a clockwise or anticlockwise manner.

### Step 12

Lining up at each leg on your trampoline you will see black straps. These need to be clipped behind the leg of your trampoline. This further secures your trampoline tent to the trampoline.

### Finished Stage

Now you have set up your trampoline Roof or Tent, it will create hours more enjoyment for your children. Please note that this accessory is not designed to be permanently erected and needs to be removed during strong winds and heavy rain.
